1. The following is an examiner's statement of reasons for allowance: the examiner agrees with applicant's arguments that combination of the discontinuous layer of JP-A '102 with either Chappell et al. or Cabell et al. would be taught away from as the movement of the embossments of each of these references, which provide the elasticity of the references, would be restrained by a second layer. Regarding the "X" references listed on the PCT search report for PCT/US2004/038215, not previously discussed in the record, Garbee et al. (U.S. 5,125,659) does not teach a tissue sheet or anything regarding a Poisson ratio and WO 91/01186 does not provide any teaching of a creped tissue sheet derived from pulp.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
